

Pleasant Valley Subdivision Road & Drainage Improvements

MOA Project #14-26B

Project Newsletter No. 9 PROJECT UPDATE

September 9th, 2020

Project Status Update – Phase 1B

This is a construction update for the road and drainage improvements in the Pleasant Valley area. Construction is noticeably underway on Little Dipper Avenue and the classic Alaska fall rainy weather has made a few challenges for us. Nevertheless, we are putting the final touches on subgrade improvements and in the next few days we will start installing the concrete curb on Williwa Avenue, Northwind Avenue, and Skipper Street.

The Contractor will be setting up stringlines to help layout the concrete curb on Thursday, September 9th, 2020. If all goes well, we should be pouring the concrete curb on Thursday, Friday, Saturday, and Sunday (September 10-13).

After the stringline set and concrete curb is poured, we need your help! It is imperative that no cars drive over or park against the concrete curb for (3) three days after the concrete curb is poured. During this time access to your driveways will be cutoff. Please park your vehicles away from the curb or on adjacent streets. We will try to place no parking signs and barriers as reminders.

This will also be true for the concrete sidewalk. We ask that you not walk on or ride bikes on the new sidewalk until it has had enough time harden.

If you have any questions or concerns please do not hesitate to contact us, using the project contact information to the right. We understand the inconvenience construction projects impose on you and your neighborhood and appreciate your continued patience and support.
